

The Federal Communications Commission

Dear The Federal Communications Commission,

I do not want to pay more for my telephone service! I urge you to reject a flat fee proposal that would change how contributions are made to the Universal Service Fund. I am concerned that this proposal could make my current service unaffordable.

Under the flat fee proposal you are considering, people who make few long distance calls would pay the same as people or businesses that make many calls. In other words, low-volume and primarily residential customers would bear the same universal service fund burden as a high-volume residential or business customers. This is unfair!

I use my wireless phone for safety, security and convenience. I don't want to lose these benefits so that big businesses can pay less than their fair share. I urge you to reject the proposal to move the USF collection system to a flat-fee.

Keep the USF Fair!

Please...

If it were not for my TracFone I would be unable to attend my social events especially in the winter months as I feel more secure in knowing I can call for help and not have to walk, should a problem arise. I can not afford a cell phone with monthly fees and this TracFone gives me some freedom. I am now in my senior years and it helps me to feel independent and independence is important to me and many seniors who need to feel they have control of their own lives. It helps us to sustain our dignity (which is important to all human beings) even though our income is greatly reduced in our senior years. Please keep this in mind when you make your decision as it will be so appreciated by many who are on small incomes, and someday God willing, you too.. will be among us seniors and know how important it is to have a feeling of independence. Thank you, Susan Little

Sincerely,

Susan Little
